For Earth, For Life
Kubota

When the going gets tough, get aboard a Kubota RTV-X1140.

It's no secret that Kubota RTVs have been the best-selling diesel utility vehicles in Oceania for over a decade. After all, they've set the standard for ruggedness and reliability year in and year out.

And now these best-selling, standard-setting utility workhorses just got a whole lot better. Introducing the new Kubota RTV-X1140 Four-Seater, improved throughout to give you the best possible performance and comfort across a wide range of jobs. When you need to move a crew, fold up the cargo bed and flip down the rear seat; the RTV-X1140's generous seats offer a comfortable ride for up to four adults. When it's cargo that needs hauling, flip up the seat and fold down cargo bed; the RTV-X1140 now has industry-leading cargo capacity and a standard hydraulic bed-lift that makes short work of dumping tasks.

No wonder the best-selling diesel utility vehicles in Oceania since 2004 have been Kubota RTVs.

KUBOTA 4WD DIESEL UTILITY VEHICLE
RTV X1140

Overseas model shown in this catalogue.

From industry-leading cargo capacity to comfortable seating for four adults in three simple steps that can be performed easily by just one person.

[K-vertible™]

1 Reposition the sides of the bed

Swing the front side panels of the cargo bed towards the back of the bed and fold down the front panel.

2 Reposition the cargo bed

Next, lift the front of the cargo bed and secure it.

3 Reposition the protective screen and bench seat

Next, move back and secure the protective screen with back rest. Finally, lower and secure the bench seat. Reverse these three steps to restore the RTV-X1140's full-length bed.

Standard Hydraulic Dump Bed

Dump sand, gravel, turf, or just about anything you can think of, from the RTV-X1140's whopping, 0.54 m³ / 0.28 m³ (two-seat and four-seat configurations, respectively) capacity cargo bed. An easy-to-operate lever activates this hydraulic bed-lift system in either two or four-seat configuration.

Two-person seating configuration

Four-person seating configuration

TOUGH

Kubota diesel engines—dependable power, when and where you need it.

Power when and where you need it

Even when the trail disappears, you can rely on the RTV-X1140 powerful diesel engine to keep you moving forward. Kubota-built and trail-proven, these 3-cylinder liquid-cooled diesel engines have a well-earned reputation for dependable performance even in the harshest terrains. The RTV-X1140 comes with a robust 24.8 HP engine.

VHT-X (Variable Hydraulic Transmission)

Kubota has more experience in variable hydraulic transmissions than any other Utility Vehicle manufacturer.

Kubota's advanced VHT-X offers a wide torque band and large oil cooler that boost performance and durability.

Front & Rear Independent Suspension

Regardless of the terrain or load, independent suspension on all four wheels ensures a truly exceptional ride. Kubota's Extra Duty IRS (Independent Rear Suspension) technology also sets a new standard for durability.

High Ground Clearance

The new X1140 raises the bar on ground clearance—to a full 285 mm with 240 mm of suspension travel—letting you glide over the bumps rather than through them.

Limited-Slip Front Differential

True 4-wheel drive with a limited-slip front differential and a locking rear differential help reduce wheelspin to a minimum, giving you greater control and a smoother ride on rough or muddy terrain.

Dynamic Braking

You'll feel more secure, especially when traveling down long inclines, knowing that dynamic braking is providing additional braking power and greater driving control.

20% Larger, Clog-resistant Radiator

Open the hood, and you'll find the radiator and air-intake located high and up front, where the air is cleaner and cooler. This improves both radiator performance and simplifies maintenance. Kubota's wide fin pitch design minimizes clogging, further improving radiator performance.

Transport plenty of people and then haul plenty of cargo.

MORE FEATURES

A variety of standard and optional features to let you work productively and travel comfortably.

Pole-free access to the entire cargo bed for easier loading from the sides.

Towing Capacity

Standard two-inch hitch receivers at the front and back let you tow up to 590 kg of gear.

Newly Designed ROPS

The poles at the rear have been eliminated for a cleaner look and easier cargo loading from the sides in the 2-seat configuration. A 5th pole has been added in the rear middle of the frame to ensure the same high level of ROPS performance that meets the SAE J2194 and OSHA 1928 ROPS standards.

More Comfortable Rear Seat

More legroom for the backseat passengers means more comfort and less fatigue, especially on long journeys. Your crew will arrive fresh and ready for action.

COMFORT

A whole new experience in driving comfort.

60:40 Split-bench Seats

The split-bench style seat is ergonomically designed to provide hours of riding comfort. The driver's side is adjustable fore and aft.

Power Steering

Responsive hydrostatic power steering gives you the control you need to tame any terrain. The steering wheel is tilt-adjustable, allowing you to set the optimum angle for your driving style.

Digital Meter Cluster

Bright, with large, easy-to-read indicators, this digital meter cluster keeps you informed of all critical driving conditions, including speed, hours, and miles traveled. An Overheat Alarm (light and audio) helps prevent engine damage.

Easily accessible Parking Brake

The parking brake is conveniently located on the dashboard for easier access as well as more legroom.

Glove Box

A large glove box on the passenger side provides fast access to critical tools and personal effects.

Under-seat Storage Compartments

Large compartments under the split-bench seats provide plenty of convenient storage space for tools, tie-downs, and personal items.

SPECIFICATIONS

Model			RTV-X1140 Work Site	
Body color			Kubota Orange	
Engine	Make		KUBOTA D1105-E4-UV-2	
	Type		3-cylinders, 4-cycle, diesel, OHV	
	Displacement	cc	1123	
	Horsepower*	HP (kW)/rpm	24.8 (18.5)@3000	
	Cooling system		Liquid-cooled	
Fuel tank capacity		ℓ	30	
Transmission			Variable hydro transmission (VHT-X)	
Max. Traveling speed		mph (km/h)	25 (40)	
Wheels, drive system			4WD	
Front differential lock			Limited-slip differential	
Rear differential lock			Foot operated differential lock	
Gear selection			Hi-Lo range forward, Neutral, Reverse	
Brakes	Front / Rear		Wet-disc brake	
	Parking brake		Rear wheel, hand operated	
Steering			Hydrostatic power steering	
Suspension			Dual A-Arms independent suspension	
Dimensions	Length	mm	3610	
	Width	mm	1605	
	Height, overall	mm	2025	
	Front tread centers	mm	1280 (HDWS)	
	Rear tread centers	mm	1280 (HDWS)	
	Wheelbase	mm	2495
